A Plus is one of leading manufacturer & exporter of suspension & steering parts for the automotive aftermarket industry since 1992. A Plus was focused on exporting and increased its export shares in each year to target to 100 %, exporting activities are made mainly to Europe, North & South America and Africa.

By 2008, A Plus made big capacity and capability investments and today increased its capacity to 2.700.000 pcs per month together with new manufacturing plants.

With dedicated staff and over 30 years of experience of production, we are proud of giving best services.

A PLUS production is mainly focused on passenger cars, light and heavy commercial vehicles for European, Asian and American applications in advantage of flexible and fast service, shorter lead time, approved quality and competitively priced lines are the main features making APLUS a reliable and successful long term partner.

A PLUS, acts with the principle of being a solution partner in every field.

It carries the manufacturing in the desired quality and time by combining the computer aided design, engineering and manufacturing methods with its experience of 35 years.

It carries out every stage of the products from the design stage to the final stage by using the modern design and production programs that keep the efficiency and creativity in the highest level.

It offers economic and reliable solutions to its customers by designing all the process from the cast loads to the material flow in the most efficient way.

A PLUS, is in continuous improvement and development. It increases its production and quality every passing day by making mutual projects with the international R&D companies expert in their fields.

With its respectful production concept to the nature and human it carries out R&D studies in energy efficiency and uses the current resources in the most efficient way.

Establishing all the systems necessary in the manufacturing process within its body A PLUS carries out every stage of the product from the design to the final control by using the advanced techniques and offers special solutions with high quality standards to its customers.

Molding Room

The molding application of the special products designed is carried out by using modern production techniques.

Forging Unit

In forging unit, the specially designed new products are manufactured in high quality.

Wishbone Stamping

As in the other manufacturing stages, all the manufacturing in Sheet Metal Wishbone part are also planned and monitored via ERP and MRP.

Machining Shop

In the machinery with high technology, rapid and high standard manufacturing is carried out with minimum fault rate.

Surface Processing

The surface processing against corrosion is applied for each product manufactured for the usage condition and using times guaranteed to the customer.

Assembly Line

The installation part carries out manufacturing with performance increasing every passing day in Original and Aftermarket production lines.
